BoneWare® PARTY CUTLERY

*Resale Pricing Policy RRP & MAP

American Diverse Business, LLC (BoneWare Cutlery) requires all retailers, whether brick & mortar or online stores or through distribution channels, to sell at or above the ***Recommended Retail Price (RRP)** as listed on this Product Info Sheet. (Distributors shall hold their retailers to the same price structure). Minimum Advertised Price (MAP) practices such as "Add to your shopping cart or Mouse over [HERE](#) to see our unadvertised price" are considered noncompliance, as are the following: Quantity Discounts, Special Discounts, Coupons, Free Shipping or similar discounting tactics will result in a 90 day restriction for 1st infraction and termination of this partnership upon the 2nd infraction. **Purchasing BoneWare products implies you will adhere to this policy.**

Benefits for Adhering to BoneWare Party Cutlery's Resale Pricing Policy, BoneWare Party Cutlery participates in cooperative advertising by sharing images, marketing strategies and other sales tools free of charge to interested resellers. The Brand and customer loyalty are built on a quality American made, educational, useful product that doesn't end up in the landfill. BoneWare is patent pending and with limited distribution, higher profits can be realized by all the resellers because there is no other similar competitive product. "Free riders" or "drive-to-the-bottom" or resellers offering no support or customer service are excluded.

Laboratory Tested Safe & Strong

Our raw material and finished product were tested at an accredited UL laboratory to be toxin free. Comparative strength tests showed regular plasticware broke into pieces with only 2.2 pounds of force, but BoneWare didn't break even after being subjected to 15 pounds of force on the fork tine tips. BoneWare is guaranteed for life if not abused - for details see

<https://www.boneware.com/product-page/boneware-cutlery>

BoneWare is the only set of utensils that comes in a reusable clamshell for storage after washing, further demonstrating it is an environmentally friendly plastic product.
